MISSION

To Lay a Strong Foundation for
all Learners by Creating a
Constructive and Positive
Learning Environment

VISION

To Provide Learning
Opportunities Beyond Books
and Walls

GUIDING PRINCIPLES

About Us

JumpStart EduCare is a Joint Venture of Radhika EduCare School and Kalyan Polytechnic College run with the vision of Laying a Strong Foundation for all Learners by Creating a Constructive and Positive Learning Environment.

Dr. Bhartesh Shah
Chairman
Jain Education Trust

We celebrate the fact that each student is different, as a person and as a learner and therefore we aim at catering to the individual learning needs of each child, particularly of those who need special help.

We aim not just to impart knowledge to the students, but also to inculcate in them - wisdom, compassion and a humanitarian spirit by providing an environment where their 360° development is the focus.

Mr. Pranav Khatuwala
Management Member
JumpStart EduCare

To be able to cope up with the increasing pace and change of present-day life, schools need to facilitate children to learn life skills. Skills like team spirit, inquisitiveness, creativity, trustworthiness, sympathy, coordination, assertiveness, and much more come with life skill activities. Thus, the sole purpose of JumpStart EduCare is to have a pre-school in Jamnagar which will help children to build a stronger foundation for a thriving future on the academic as well as on the professional front.

Ms. Madhavi Joshi
Principal
JumpStart EduCare

Early education for children acts as a transition from home to the school environment. Children who have a good learning start, are likely to be more smarter and successful.

We believe in engaging young learners to think both critically and creatively, as well as developing as a whole person. We create the learning space for children where they can enhance their motor skills, better cognitive skills, deeper understanding, improve social interactions, and develop love for learning.

Why JumpStart?

Reflective Learning Concept:

For children, looking in the mirror is play, fun and fascinating. For mentor it is an opportunity to connect with them, laugh and enjoy the teaching-learning time together. Mirror play is also a great way to nurture child's developing self-awareness, which is key part of their social-emotional and over all development.

Theme Based Classrooms

Learning is an integrated process where the brain is constantly trying to make connections from one experience to another. Theme-based learning supports and mirrors this natural way of learning. builds a bridge between different topics, subjects and skills, helps children see and make connections between them.

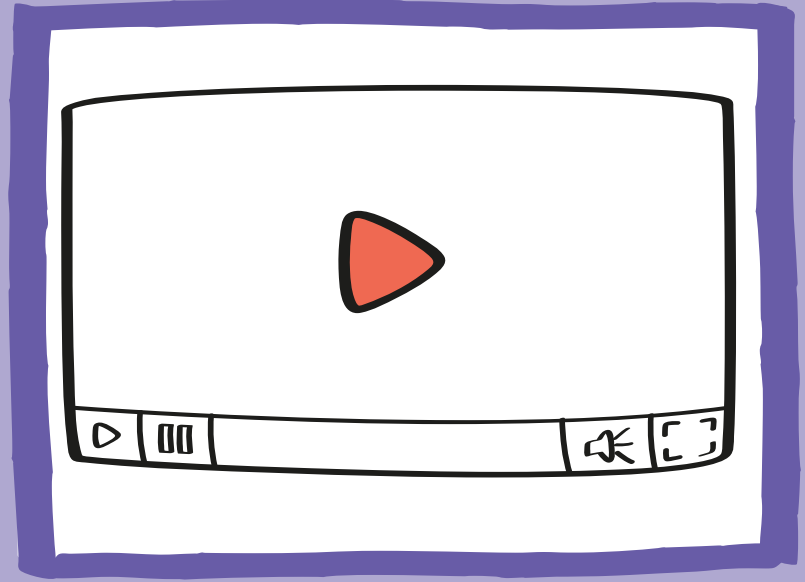

CCTV Camera

Whole school campus is very well equipped with CCTV Cameras

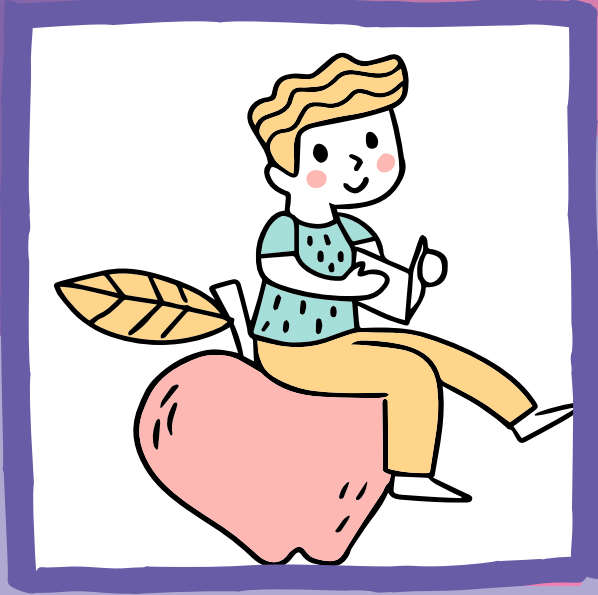

Live Access to Parents

Parents can observe their children doing the activities through the CCTV Cameras

Skill Based Curriculum:

The early years of a child are the time to build a strong foundation and to establish skills that will make them independent learners. Meeting specific mile stones in cognitive, physical, social, emotional and language skills help children to grow into strong and healthy adults. In order to active this JumpStart EduCare provides a curriculum that develop the required skills.

No Text Books

"A textbook is only as good as the teacher who uses it" It also allows teachers to plan more hands-on activities, classroom discussions, and open-ended learning.

Activity Rooms

The school has a number of rooms which are carefully designed for children to work on their art, craft, music, dance, and other indoor activities. Setting the right kind of environment inside the activity room can unleash the child's creative energy

Sand Play Area

There are endless creative possibilities when it comes to sand play! Playing in the sand is terrific for developing motor skills, building hand & eye coordination, and strengthening muscles.

Library

The school library is uniquely and creatively designed to help children with their early literacy, critical and creative skills. E- library provides children and mentors opportunity to create learning space through different audio-visual aids in comfortable sitting arrangement.

Toy Library

Toy library can be described as a typical book library with a collection of toys for young children and a place for recreation just like studying room for reading books. It provides an opportunity for the child to choose toy for themselves and play with their peers it creates scope for children to socialize more and gain independence.

Managerial Strength

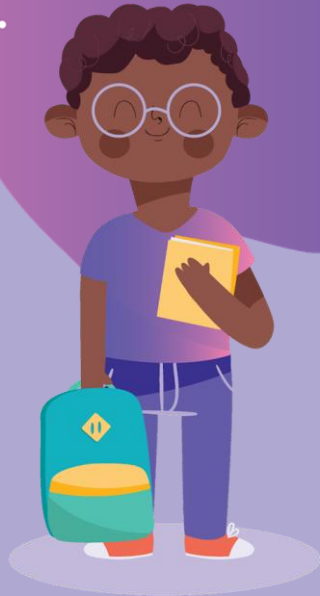

Qualified Teachers

Well qualified teachers are able to offer a variety of different techniques and methods for students to learn.

Training given on regular basis

Training is a continuous never-ending process which promotes teacher's teaching skills, which in return assists in improving student's learning.

How we Ensure Quality Education

12:1 Students-Teachers Ratio

Fewer students let the teachers have more manageable workloads and more time to work one-on-one with students; they can engage them more, try out different activities and lessons that might not be feasible in a larger class size.

One on one attention to
the need based children

Home Schooling

Home schooling helps in teaching the kids in a better and an effective manner by developing a one-to-one relationship with them, and also helps in initiate discussion between parents and kids where the parents can also learn from children.

Collaboration with Home and Parents

Regular Home Visits

Home visits could increase student performance, parent involvement, reduce discipline problems and increase overall positive attitudes

PTM – School Initiated & Parents Initiated

The union of the teacher's feedback and parent's concern can immensely help a child's educational journey.

MLV – Making Learning Visible

MLV (Making Learning Visible) is one of the most important practices of JumpStart EduCare. It gives us immense pride when we see our children sharing their learning confidently with their parents in fun way.

Collaboration with Home and Parents

Orientation Programme

Orientation for Parents are scheduled in the year beginning to brief them about the curriculum of the year, school policies, events etc.

Sharing Every day's Agenda

In order to explain the parents whatever the child has learn, same thing is shared through Agenda so parents will know what they are learning in the classrooms.

ERP

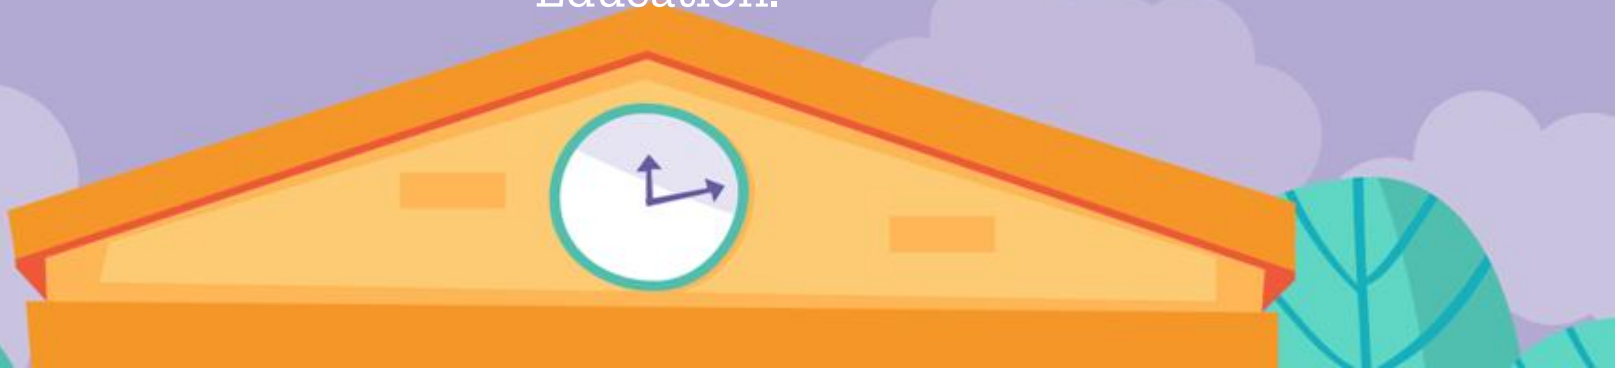

Considering Parents as Partners we keep in touch with them through our School Application which keeps them up to date with the information available in the same.

What we do as a part of Community Service/Offerings

Mother Toddler program, Counselling of the Parents,
Spreading awareness regarding Early Childhood
Education.

JSE Collaborations

DinoLab – Dinolab is an adaptive International Self Learning Program that aims to prepare the students to become independent and achieve their goals. Their prime motto is to create a significant impact in the average scores of the school subjects especially in Maths across the globe through the interactive, customized, personalized, gamified, adaptive learning program

PriDarsh Academy – Focusing more towards cocurricular Activities, PriDarsh Academy provides classes for Classical Dance, Western Dance, Aerobics, Drawing, Taekwondo & Chess. We keep modifying and introducing new activities as per requirements.

ISO Certification

JumpStart EduCare Pre-School is ISO 9001:2015 (Quality Management System) Certified school.

JS has been assessed by RAPL and found to comply with the requirements for ISO Certification for the following activities:

- Providing skill based learning
- Pre-Kindergarten (Playhouse & Nursery)
- Kindergarten (LKG, UKG), Home Schooling, Activity Schooling & Day Care with Different Learning Experiences.
